SG1221	CORDED	pair	100	
SG1222 *	DETECTABLE, CORDED	pair	100	
SG1223	BANDED	pair	each	

ATTENUATION

A perfect Fit earplug effectively fractures the sound waves and reduces the sound intensity.
Perfect Fit earplugs complies with the limits specified in **SABS 1451**

COMFORTABLE

Comfortable Perfect Fit earplugs are a low pressure earplug which virtually eliminates pressure on the ear canal, making Perfect Fit earplugs an extremely comfortable earplug for long term usage.
Tapered and pre-shaped, Perfect Fit earplugs are designed to follow the contour of the ear canal, providing easy insertion and a comfortable, natural seal.
The winged end promotes optimum insertion depth, and easy grasp for removal.

HYGIENE

Work environments are often dirty, and workers' hands pick up contamination which can easily be transferred to the earplug surface. Perfect Fit earplugs are smooth and soil-resistant which helps prevent foreign material from penetrating them during insertion.
Wash with soap and water.
Perfect Fit earplugs can be used for months.
